

Control, allocate and recover your telephone expenses.

For businesses
hotels/motels
lawyers
accountants
hospitals
government offices

Genesis *the simple choice*

With the explosion of services like call centers, the internet, voice mail, email & ISDN, you just can't guess about your telecommunication requirements any more.

Telecommunication expenses are becoming more complex and difficult to control with features like internet access, ISDN, digital tracking, multiple carriers, telco feature codes, voice mail, cellular and fax phones, etc. *Genesis Call Accounting* allows you to take control of your telephone system. Whether you are allocating telephone charges, billing hotel guests, clients or projects, monitoring telephone traffic, or tracking telephone abuse and fraud, *Genesis* has just the right system to fit your needs.

Gain control over telephone costs

Six phones or 6000 — sales, financial, retail, manufacturing or health care — one office or many — *Genesis* costs your calls and can display, print or email reports instantly to help you manage and control your phone expenses. *Genesis* tracks telephone expenses right back to their source. *Genesis Traffic Reports* help you determine the most cost-effective combination of telephone lines and services. *Genesis Equipment Inventory Reports* track the location and help you allocate the costs of your telephone equipment. *Genesis* ensures you get maximum performance from your telecommunication investment.

Allocate telephone charges to clients or projects

Charge back your clients...automatically. Capture and charge back phone charges to an unlimited number of client codes. *Genesis* will add any surcharges, mark-ups and taxes that you desire. You can recover telephone costs and bill for professional time spent on the phone. *Genesis* is sophisticated enough for the largest professional firms yet remains economical for the smallest firms.

Generate revenue for hotels/motels

Let *Genesis* generate revenue for you. *Genesis* automatically adds your desired surcharge, mark-up and taxes to each call and provides up-to-the-minute reports on demand. Full audit and profit reporting shows you just how much revenue *Genesis* is generating. *Genesis* interfaces with Property Management Systems for a fully integrated solution.

Track and control telephone abuse

Let *Genesis COPS* help you protect your telephone system from abuse and fraud. *COPS* examines your calls and notifies you by alarm, email, or pager of suspect calls. *COPS Interrogator* (for Nortel PABX's) can actually disconnect the call!

Rely on us

Genesis is fully committed to superior quality, service, reliability and after-sale customer satisfaction. *Genesis* is so simple to install and use that it eliminates the need for lengthy training programs and expensive setup costs. *Genesis* continuously performs self-diagnostics and notifies you of any problems with your system. Expert technicians are available to discuss your particular questions or concerns.
